

Pool Opening Checklist

- ☐ Pump any water on top of the cover off to avoid extra pumping charges. Remove excess debris from the cover as well.
- ☐ Fill up the pool to normal operating level under the cover if possible so we can start the pool. This may not be possible on aboveground pools.
- ☐ Leave all deck equipment, plugs, baskets, return eyeballs, etc. out by the pool.
- ☐ Ensure that all major equipment, pump, filter, filter cartridges, DE elements, etc. are by the pool or easily accessible.
- ☐ Confirm that power is running to pool equipment, especially any indoor breakers what will be inaccessible.
- ☐ Please make sure that we have full access to your pool area by unlocking any fence or gates.
