

# Pool Closing Checklist

- ☐ Test pool water and balance pH, Alkalinity and Calcium levels. Bring us a sample and we will professionally test for free!
- ☐ Vacuum pools thoroughly.
- ☐ Remove ladders and steps on aboveground pools. Closing crews will not remove these.
- ☐ Pump water below the skimmer.
  - ☐ Aboveground pools with standard cover should be 2" below skimmer.
  - ☐ Aboveground pools with EZ Drain cover should be to the bottom of the skimmer opening.
  - ☐ Inground pools should be 3-4" below skimmer.
- ☐ Leave all closing equipment out by pool including cover, water bags, pillows, skimmer door plugs and return plugs.
- ☐ Please make sure that we have full access to your pool area by unlocking any fence or gates.
